- General Development Areas
- Employment
- Cemetery

St Edmundsbury Sites

- Residential
- West Suffolk College
- Sugar Restoration Area
- Employment
- New Local Centre

NOTES

1. This map shows Flood Zones as defined in Table D.1 of PPS25 within the boundaries of Forest Heath & St Edmundsbury Council, ignoring the presence of any existing flood defences. It should be read in conjunction with the supporting information presented in the Strategic Flood Risk Assessment Level 1 Report, prepared by Hyder Consulting December 2008.
2. Flood Zones 1, 2, 3a and 3b refer to the probability of river and sea flooding only, ignoring the presence of defences. They also ignore additional risk due to blockages of river channels and structures.
3. The sites in the St Edmundsbury Council area were taken from the 2007 LDF for employment and updated information in October 2008 for the potential residential allocations.
4. The sites within the Forest Heath Council boundary were taken from their LDF 2006.
5. The effects of possible climate change over the next 100 years have been represented for Flood Zone 3a, where these model outlines have been currently completed. The locations where further modelling will be required are indicated in the Level 1 SFRA report.
6. For historic internal & external sewer flood locations please refer to Appendix D of the Level 1 SFRA report.
7. All flood risk areas at the boundaries of the study area need special attention when used for any purpose as the map only shows areas at risk within the respective Council Boundary.

For 1:10,000 Map Tile Location please refer to Drawings 0101-BM01397-BMD-02 & 0102-BM01397-BMD-02.
